Action Requested

Motion to approve these nominations for World Sailing Rolex Sailor of the Year submissions to World Sailing...

Male Nominee #1: Malcolm Page **Peter Duncan**

Peter Duncan - winning the 2017 J70 Worlds – September 2017 with 161 boats entered. He also won the 2017 USA Rolex Yachtsman of the Year. Pretty impressive as an amateur sailor taking on the pro’s in this class.

Male Nominee #2: Submitted by Russ Lucas **Michael Buckley**

I am proud to nominate for 2018 Michael Buckley as sailor of the year. Mike's record as tactician over so many years is of the highest order across so many classes it's remarkable. But his success or more importantly the success he has brought to his skipper and teams as a master tactician in 2018 goes beyond anyone I have seen in the World of sailing.

In 2018 Mike has been tactician and built this record… 1st Congressional Cup, 1st Bermuda Gold Cup, 1st Canadian Melges 24 National Champs, 1st Melges 24 Midwinters, 1st St Pete NOOD and Overall Winner, 2nd Etchells Nationals Champs tied for 1st, 2nd J 70 NA champs, 3rd Melges 24 World Champs (tied for 2nd on board Monsoon) *2nd owner driver, 3rd Melges 24 European Champs (Lucky Dog) *1st place owner driver

All these events as tactician and what a diverse list of boats, events and accomplishments. I believe with Mike as US nominee, the USA could bring home a Rolex SOY this season.

ONLY Female Nominee:

Daniela Moroz - Winning 2018 World Champs was her 3rd World Champ Title in a row. At just 17, she has also won the 2017 and 2018 within the time period below. So not only is it three in a row, it is two within the year. She was also the 2016 Rolex Yacthwomen of the year.

Action Request to the Board of Directors

Request No.  BAR20180910    Date Submitted:  9/10/2018

Submitted By:  Mike Waters CTO

Subject:  Contract with Fonteva for Association Management System (AMS)

Action Requested:

So it be resolved, the US Sailing management team requests approval to enter into contract project with Fonteva for an Association Management System (AMS) that will take the place of the current SailorBase database along with many other associated processes to serve our membership.  5 year contract value $460,000 which includes upfront development, training, data migration and rollout of $185,000 and $55,000 annually of SaaS services, hosting and premium support.  Approximately $150,000 of approved budget for the development phase of this project in 2018 was not exercised

Member Impacts: Describe below the impacts (i.e. Will it be seen as a member benefit or not? Explain)

Any perceived positive effects:

- The new Fonteva SalesForce based AMS will put our layers of constituents in better control of how they interact with US Sailing.  When implemented, a member will have a home screen that becomes their resume and portal.
- All education, certifications, volunteering and public interests are displayed along with extended associations with RSA’s, Clubs, Class Associations, race committee crews, etc.  Similarly, these extended organizations will be provided the US Sailing Fonteva platform to serve their members who are our members or potential members allowing US Sailing an end to end view of those involved in the sport.
- All US Sailing transactions will have the same look and feel of ordering from a secure store.
- Members will be acquired in “one click”.
- The system will be green, mobile, ADA and member friendly.
- Calendar of events will be displayed in a format consistent with our website.
- The system will allow us to have a one to one relationship with our members.

Any perceived negative effects:

- There will always be the challenge of people who are set in their ways and not accepting of change.

Will this proposal bring in new members?

☐ Yes, we anticipate 1000 in first full year, similar numbers moving forward, high degree of focus on retention.

Mission Impacts: Describe below how and why this creates value.

Positive impact (be specific):

- As a part of our continued path of on-demand, cloud-based solutions, the Fonteva SaleForce AMS will reduce the costs for US Sailing as it provides a common platform for many functions.
- US Sailing will improve sales channels and enhance communication at all levels.
- Other clients using Fonteva Salesforce AMS have seen faster decision-making, an increase in revenue, and a major jump in customer satisfaction and memberships.
- Salesforce has a not for profit project office where US Sailing will be able to leverage cutting edge solutions to enhance our interactions with the membership at negotiated costs or via donation.
The move to a sustainable AMS is essential to the continued transformation of US Sailing.
The new system will provide the entire staff a platform to not only serve but to understand our membership. This understanding will allow all of the departments to make data driven decisions.
The major goal is to turn constituents and those who enjoy US Sailing products and services into members along with a laser focus on retention.
The system and rollout will be staged with all stakeholders involved and invested.
Many internal processes will be streamlined and standardized, freeing up staff time for higher value pursuits.
The data quality of members and potential members will help us to secure sponsorships.
The entire project is focused on obtaining a high return on information.

Financial Impacts:
Describe below any expected financial impacts on US Sailing. Include figures.

Internally: Staff time and overlapping systems will be required during implementation estimated at ¼ time. This project will require additional work for all departments. Anticipated with rollout 9 months with careful sequencing of departmental resources, minimizing time conflicts. Full user acceptance and cut over is anticipated early Q42018.

This contract expenditure recognizes the unused budget of $150,000 approved in 2018 and accounts for the ongoing costs which will be equal or lower that of current spend.

Key elements are:

- Fonteva’s expertise is Association Management. A ten month search shows Fonteva has the customer base (commercial / not for profit associations) and financial stability to be a vendor partner of US Sailing.
- Financial structure created to ensure partner relationship. Shared risks, shared value.
- This receipt will allow for continued negotiations of terms & conditions. Working to structure the project with minimal cash down and monthly payments with the vendor partner, with documents will be available shortly after finalizing a favorable US Sailing position.
- Implementation, training, customization, integration, data migration and final user acceptance charge of approximately $185,000, time and material at $195/hour.
- The project will use Fonteva and ¼ US Sailing man hours.
- Ongoing yearly charges of approximately $55,000.
- Implementation time of 9 months.
- Dedicated Fonteva project manager with formal project communication cadence.
- Two, 1 year renewals at 2018 rates for years 6 and 7 with no further action.
- Termination for convenience with 30 day notice without obligation with all data retained by US Sailing.
- Due diligence with full scope revalidation of the project within the first 30 days.
- After roll-out and acceptance a project will be staged to eliminate redundant systems that will save $58,000 yearly in hardware, software, support time and maintenance costs.
Summary:
We recommend that the Board approve this expenditure of over $100,000 per the bylaws 8.03a.
